### Recommendations for installation.

Place a strainer upstream the valve with a porosity  $\leq 100\mu$ .  
Mount the valve preferably over horizontal pipeline with the coil upright. The valve input pressure must always be  $>$  than the output pressure. In order to allow the normally closed or normally open valve to open, the minimum pressure indicated for each model must be respected.

Shape A DIN 43650 Connection encapsulated coils.  
IP65 and NEMA4 Protection.
