

Series SOLVLV2 Solenoid Valve

Applications:

- Pumps. Laundry equipment.
- Irrigation. Compressors. Pollution Controls.
- Heating with medium or high pressure steam.
- Autoclaves. Industrial laundry equipment.
- Spraying. Irrigation.
- Air dryers. Water treatment.

Main Characteristics.

- Normally closed or normally open.
- Servo-operated action.
- 3/4" to 3" BSP or NPT threaded connections.
- Body: Forged brass or stainless steel.
- Core tube SS. 304 and 316.
- Plunger and fixed core: SS. 430 F.
- Shading coil: copper, silver or aluminium
- Shape A DIN 43650 connection encapsulated coils.
- IP 65 and NEMA4 Protection.

Options:

- Energized coil indicator light.
- Explosion and/or weather proof coils and housings
- Manual operator on pilot orifice.
- Manual operator on main passage.

Operating pressure differential

***Advise:** when using direct current (DC), a 25% reduction on the maximum operating pressure differential is expected

Recommendations for installation.

Place a strainer upstream the valve with a porosity $\leq 100\mu$.
 Mount the valve preferably over horizontal pipeline with the coil upright. The valve input pressure must always be $>$ than the output pressure. In order to allow the normally closed or normally open valve to open, the minimum pressure indicated for each model must be respected.

Shape A DIN 43650 Connection encapsulated coils. IP65 and NEMA4 Protection.

Coil characteristics

Electric power supply	Coil type	Power W	VA (volt-ampere)		Maximum temperature		Available tensions
