

Classroom & Office Spaces Solution

Carbon Dioxide Protection & Air Quality Monitoring

Advanced Indoor Air Quality Sensing Technology

- Incredibly Easy to Use & Install**
- ✓ Dual powered 110vAC or 24vAC for plug and play installation
 - ✓ Ventilation activation boost, mute and screen wake up buttons
 - ✓ User friendly settings menu

ENSURE A SAFE WORKING ENVIRONMENT

The Merlin CO2-X is designed to monitor carbon dioxide (CO2) in the air, local temperature and is typically used in classrooms or office spaces where no gas is being used.

This monitor has a digital traffic light style display indicating the carbon dioxide levels and temperature in the area. When CO2 gas or temperature reaches alarm state – this device is able to automatically drive ventilation fans reducing CO2 and temperature.

The AGS solutions are already protecting hundreds of academic properties across the U.S.

Intuitive and accessible design makes the AGS range easy to specify, easy to install and very user friendly.

Modern components compliment years of industry experience to provide a tidy solution to classroom & office safety.
