

# ASHRAE Academic Ventilation COVID-19 Guidance

## Carbon Dioxide Air Quality Monitoring & Life Safety

### Advanced Indoor Air Quality Sensing Technology

#### Average CO2 Levels

Average CO2 readings over an 8 hour period when above 600ppm

AVERAGE  
689

**Gas in use**  
Indication when the gas is being used

GAS  
IN USE

**Temperature readings**  
displays temperature levels over 30 minute periods.

22.8 °C

**CO2 Levels**  
Displays current CO2 gas levels in part per million (ppm).

799

**0-10V Outputs**  
0-10V analogue output progress bars

1 2

**Easy Installation**  
Engineers settings menus for easy navigation

Wrench and screwdriver icon

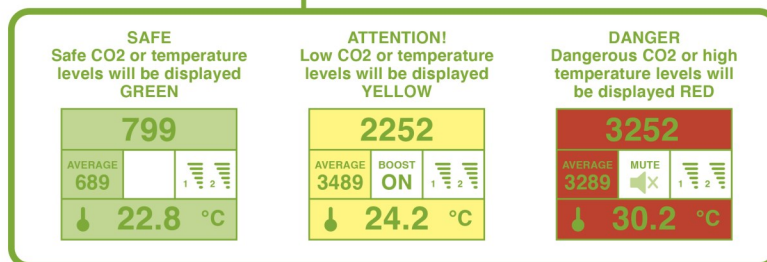

BOOST  
ON

**Boost on**  
Analogue outputs will run at optimum voltage

MUTE

**Mute**  
Sounder alarm mute indication.

**Touch button**  
Used to activate 'Boost' or 'Mute'.

#### Traffic Light Indicator

Display changes colour dependent on the CO2 levels and temperature.  
Green - Safe / Yellow - Attention / Red - Danger

#### Incredibly Easy to Use & Install

- ✓ Dual powered 120v AC or 24v AC for plug and play installation
- ✓ Ventilation activation boost, mute and screen wake up buttons
- ✓ Can be used to automatically ramp fans up and down dependent on CO2 or temperature levels

#### In Accordance With ASHRAE COVID-19 Guidance

An ASHRAE document for reopening schools and universities has been released, giving new advice when ventilating academic buildings, in order to reduce the spreading of COVID-19.

The Merlin CO2 TFT is a NDIR sensor which exceeds the guidance set out in this document and is necessary to protect public health, safety, and welfare.
