Carbon
Monoxide &
Nitrogen
Dioxide
Monitoring

OFF THE SHELF SOLUTION AGS PARKSAFE

Carbon Monoxide & Nitrogen Dioxide detection and ventilation control systems are required in the above enclosed garages to meet IMC 2021 404.1.

Carbon Monoxide & Nitrogen Dioxide is produced from the incomplete combustion within vehicles and must be ventilated if code required levels of either gas are detected.

In addition to meeting code, adding a gas detection & ventilation control system in these spaces provide energy savings by regulating the ventilation within the space dependent on the live gas levels.

AGS Products Controllers

AGS ParkSafe Controller

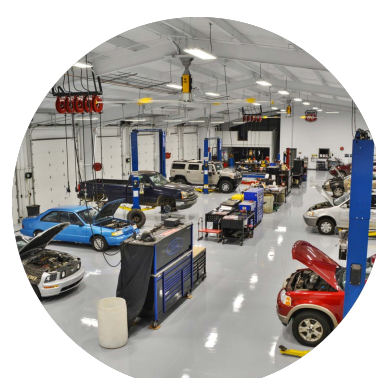

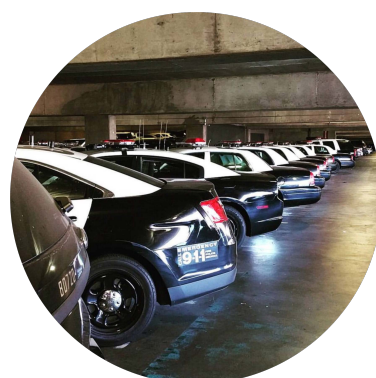

Gas Detectors

AGSCOPS Carbon Monoxide Detector
AGSNO2PS Nitrogen Dioxide Detector

Ancillaries

AGSAA Audible Alarm Strobe
