# GAS SERVICE MANUAL RESET CONTROLLER AGSFAM1

## AGS Products Controllers

AGS FAM1

## Solenoid Valve

AGSGSV

## Weatherproof Solenoid Cover

AGSGSV-WP

The AGSFAM1 is a gas service controller with manual reset designed for the foodservice industry. The AGSFAM1 provides a simple connection between the fire alarm and gas supply for automatic shutdown in alarm and requires keyed manual reset after the condition has cleared. Only trained persons can reset the gas after alarm.

AGS supply a range of UL listed gas solenoid valves, normally closed for safety shut off for indoor applications. For outdoor applications or additional protection against water and debris, AGS also provide weatherproof solenoid valve enclosures and covers.
