

AGSLPGCO-50 Mini Merlin Datasheet

Combined LPG & Carbon Monoxide Monitor

Product Overview

The AGS Mini Merlin LPGCO-50 is a dual gas sensor designed and tested to UL standards for the purpose of monitoring levels of Liquefied Petroleum Gas (LPG) and Carbon Monoxide (CO) in the air.

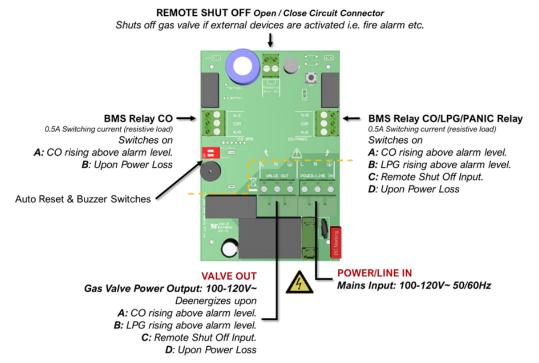

If there is a dangerous build-up of gas or unsafe levels of carbon monoxide at the sensor, this device can shut off fuel supplies or power supplies via gas valves and/or electrical contactors. On board relays can interrupt appliances built in safety circuits such as fan proving switch or louver proving switch.

This device has a manual reset button, as well as audible and visual alarm - it can also be integrated with a Building Management Systems and fire alarm control panels. Meets the Texas Carbon Monoxide Interlock TDLR Code - Section 65.206 Boiler Room & Georgia Carbon Monoxide Interlock Code - Rule 120-3-26-.07.
