

AGSP

Water Leak Puck

Key Features

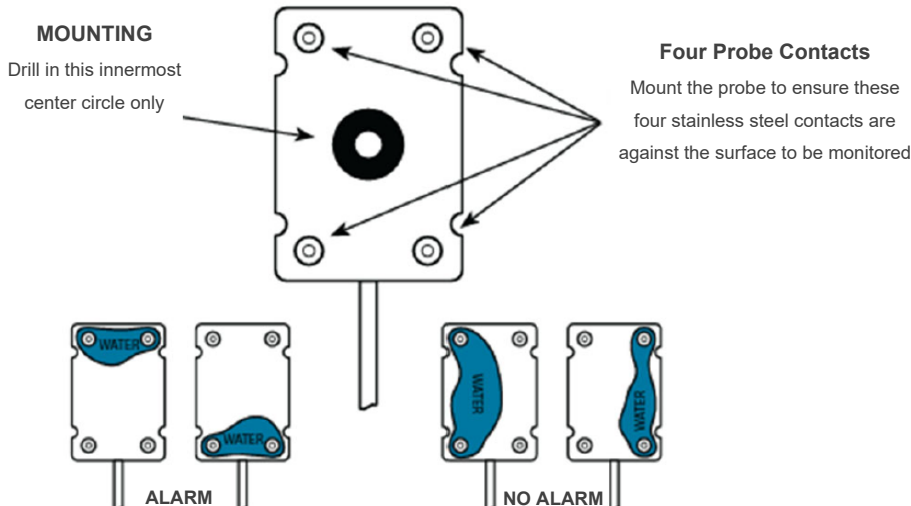

- Connect up to 8 sensors wired in parallel up to 200FT using 22AWG twisted pair
- Can be used to detect water or the absence of water
- Will not alarm due to condensation or humidity
- Designed to detect nonflammable conductive liquids (distilled water cannot be detected)
- Compatible with monitoring by the AGSWLM

Product Overview

The AGSP can monitor eight water leak sensor probes positioned up to 200 feet away, detecting and preventing water leaks to avoid expensive damage. If any of the water sensors identify a leak, the AGSP will send a fault signal to the linked AGSWLM. Importantly, the AGSP is designed to avoid false alarms caused by condensation or high humidity.

Technical Specifications

Sensor Diameter	3.0" x 2.0" x 0.88"
Coil Length	15"
Weight	6.0oz
Max Sensor/Device Distance	1 to 8 sensors with max distance of 200FT
