### PREVENT WATER USE DURING TESTING

### TIMED CONTROL FOR DRUG TESTING LAB WATER SUPPLIES

LOCKABLE COVER AVAILABLE

#### Automatic or Manual

Control over water

#### Four Timed Delay Options

2 minutes, 5 minutes, 10 minutes or timed water cut off disabled

#### Adaptable Utility Output

For water or electric control  
110VAC or 24VAC/DC

#### Power Supply

110VAC or 24VAC/DC

#### Dry Contact Inputs

For remote panic buttons and fire alarms

#### Easy To Use

Clear LED status display

#### Modern & Compact Design

Strong polyac PA-765, designed to withstand daily use

#### Optional Covers Available

Wall mounted with flush or lockable shield available

## PRODUCT OVERVIEW

The AGSTWC provides a timed supply of water via a 110VAC or 24VAC/DC normally open water solenoid valve, or an electrical power supply.

Typically used for drug testing laboratories to comply with the Department of Transportation (DOT) 49 CFR 40.43 – Subpart D. Each controller has a selectable time out function built-in via internal dip switches, for 2 minutes, 5 minutes, 10 minutes or timer disabled. When the timer has reached the owner's selected setting, the front LED will flash to warn user of the time out.

The AGSTWC is manufactured in a modern polycarbonate enclosure which provides protection from damage. The AGSTWC is designed to replace contractor constructed solutions for timed supply and panic shutdown, incorporating a crucial reset of the timed supply after a panic shutdown.

### PROVIDING SAFETY & CONTROLS IN

- SCIENCE LABORATORIES
- BOILER ROOMS

## SIMPLE OPERATION

**Green.** Remains illuminated when water valve is closed.

**Amber.** The controller LED will turn amber ten (1) minute before the automatic water shut off timeout is reached and the buzzer will beep, and the amber LED will then intermittently flash. After this time, the water will automatically turn on until reactivated.

**Red.** Remains illuminated when a remote emergency stop device has been activated. The water supply is isolated until the emergency has been investigated, rectified, and reset. Press ON to re-enable/open the water supply.

## PROTECTIVE COVERS AVAILABLE

These indoor/outdoor low-profile covers protect devices without restricting legitimate operation.

The versatile cover offers excellent protection against physical damage (both accidental and intentional), dust and grime as well as severe environmental conditions inside and out.

**Wall Mount Cover:**  
AGSTWCWMCOVER

**Flush Mount Cover:**  
AGSTWCFMCOVER

## PLUG & PLAY INSTALLATION

Internal Fuse: Anti-Surge 3.15A 250V~  
Wire Rating Min. 18AWG Tinned Copper @ 167°F
